The you, Madam, we want to say this. We
of General Foods know how much planning and ingenuity you have had to use
to keep your family happy when wanted
goods have been scare. We know the
demands that hard shopping conditions
have made on your determination, good
humour and nervous energy.

If you are a grocer, this is an appreciative message for you, too. We know the strain you have been under in running your grocery business well in spite of food shortages, sporty distribution and scarcity of help.

As a major factor in the industry, we ourselves have carried a responsibility. We have tried to distribute our products with fairness to all and feel that we have been reasonably successful.

But without the co-operation of housewives and grocers, and of our employees who have done their part so loyally, no such success could have been possible. who have done their part to toyany, no such sucress count have been possions.

We offer you our slucere good wishes for 1945. We hope to have a continuance of your splendid co-operation. For, however well our best hopes for the future are fulfilled, the effects of the war will not speedily be overcome.

KITCHEN DOOR

Time was in days of long ago And childhood glorious, The mother early let us know Which door was meant for us. The "welcome" on the front step mat Was not for children small, And if we ever ventured that,
"Go round!" we'd hear her call.

We met no front-door smiling face We met no iron-toor sming sace when coming from the street. The hall we weren't allowed to race with mud upon our feet. The hired girl knew mother's rule And she enforced it, tool She'd tell us when we came from school:

"The kitchen door for you!

Let grown-ups use the halls of pride And enter, bell or key. The manious fine where they abide, A small boy still I'd be. When home I come to peace and rest, The long day's tolling o'er, Still seems the kitchen door the best; The good, old kitchen door!

A personal note on Post-War Planning \*that gives us an idea of what we're fighting for

\* Those are the words of Howard McLean, young naval telegraphist, who used to be ledger-keeper at our branch at Port Alberni, B.C. Telegraphist McLean was telling us what he thought of the Bank of Montreal's recently announced rehabilitation plan for him and 1,115 other men of the Bank's staff who will soon be marching home in Victory.

What Howard McLean wrote to us has been said in different ways by hundreds of fellow bank men, and letters, which are being filed at our head office, are still coming in daily from our people on practically all the fighting

Post-war planning begins at home, and, as another of our people in the services said, "the old B of M looks out for us like a mother with a rather large family". (Counting service men, the Bank's family numbers more than 8.000.)

Service men coming back to the Bank will not simply return to their old jobs. While they have been away, their standing in the Bank has been reviewed each year and salary increases have been noted in their records, according to their past performance.

As the General Manager said in his annual address to shareholders,

> "It is our intention to place these officers on the salary and, within a reasonable time, in the position, which they would normally have expected to attain had they been in the continuous service of the Bank. Our object is to see that they have not lost ground through their ser vice to their country."

Imperialism are utterly cruthed never to be again. Imperialism the individual critical cities of pulses of the individual of the pulses of the individual of the pulses of the individual titles of the Tolled States and of other little states in the tree must be no stackening in the war effort, no toping with the idea of peace in such a way as to end and the uttimate overthrow of the end and the uttimate overthrow of the Aris powers and the cleaning of human-ity from the stains and traces of German What does this mean for the United States? \$70,000,000,000 for war purposes alone this year and \$13,000,000 for \$00,000,000. That is what the United States is ready to pay in wealth beddes the sacrifices in the field, on the sea and in therefore that can be will be the utter elimination of the Aris threat to the world.

### Morsels of Food for Birds

How the birds are faring these days of sub-zero and near-zero temperature when the anow covers the ground to depths of three or four feet is something only the birds and those who are kind enough to put out some crumbs or other food such put out some crumbs or other food such as bits and leavings of meat for the feath-

ered creatures know.

The sparrow, the hardy little fellow that does not fly away in early autumn or late summer but remains here all through the year, is one which metits a passing consideration in the form of bread crumbs or bits of meat on these cold mornings, That so many of them come through the siege of a severe winter is almost unbe-lievable.

Owen Sound Sun Times says that these Owle souline Jun't first says that these birds "can hardly dig down through the deep snow and even if they could manage to get down far enough to find some food, along will come another fall of snow and stage will come another work for them to find the snow down the snow does not hide for the snow has exercised as exercised.

ame has its arrogance, and riches oft Make proud the favored few, As if the purse could taken be aloft And used, as mortals do.

Yet as with men upon a ahip at sea.

When threatening storms arise,
Riches and fame both helpless prove
to be.

All turn to seamen wise.

The skilful hand, the knowing mind,
The craftsman at his trade,
Become the friends the great must find
When troubled and afraid.

No one so rich or worldly great But ere his journey's end Will need, disaster else his fate, 'The full strength of a friend. Vice-Admiral

### JUST FOLKS

By EDGAR A. GUEST (Copyright, 1944, Edgar A. Guest) REWILDERED

A fool am I, beyond a doubt, And not a fellow wise. I've never surely figured out Just where good judgment lies.

I'm warned for pleasure now to spend Is folly, pure and plain, Since long before my life shall end I'll come to want again.

Yet, sages just as wise as they Say dolefully to me: "You're saving for the rainy day You may not live to see."

Twixt thrift and waste some point must

be
By sense and judgment scaled,
But if 'tis so, from fools like me
Tis cunningly concealed.

"Tights" is a describe the close-fitting, moisture - proof wrapping now being used to protect gun barrels, radio parts and even fully assembled automatic weapons for delivery to our troops on the invasion beaches and in the field. Thus packed, stores can be safely put ashore through the surf and, if necessary, stored in the open.

In the case of automatic weapons, the heavy black grease formerly used is no longer required. Instead, the mechanism and barrels are lightly lubricated and all the soldier need do is to strip off the covering, clamp on the magazine, and the gun is ready to fire.

There are several types of this interesting wrapping, each with its own specific use. One is of cotton sheets ing combined with "Cellophane" and coated with wax. It is strong, tough, impervious to sea water, rain,

The use of "Cellophane" in this way is an example of how this familiar transparent wrapping material is being combined with other substances to meet and overcome new shipping problems. It also demonstrates another way in which Industrial Chemistry is helping in the war.

They will be aided by the great store of
knowledge gained during the war.

Canadian engineers and metallurgists, who are constantly seeking better materi-als with which to make better products; are invited to make use of this store of information obtained through the years of Nickel research.

Thus will science and industry, working together, broaden the use of Nickel, and so help keep the Canadian Nitkel mines and plants operating and men employed.

LOANS UP TO \$1,000 WITHOUT ENDORSERS OR BANKABLE SECURITY

3 UP TO 20 MONTHS TO REPAY

Now you can borrow up to \$1,000 at Household Finance and repay in monthly instalments—\$37.47 a month repays \$500 loan in 15 months

On a Household Finance comes down. Now Household's mance comes down. Now Household's rate on eny loan is easily 115% per month on the unpaid balance. With this new reduced rate Household. Canada's largest and oldest Small Loans Company, also announces the making of loans of \$800, \$700, up to \$1,000, without endersers or pueronters. ONCE MORE the cost of borrowing at Household Finance comes down.

Household's business has steadily grown as one friend has told another about our exvice. With this growth have come lower operating costs. We want our customers to share in these savings. At our new reduced rate you save up to one-fourth, depending on the size-of-your loan and the repayment schedule you choose.

#### \$100 loan, repaid in four most payments, costs only \$3.78

Si00 less, regail is less monthly proposed to present cent and \$5.32 Notice in the table below here Household's new rate reduces your monthly payments.

Six and the six and t monthly instalments, it costs only \$3.78. Surprisingly low also are the costs of larger loans when repaid in a few instalments. Here are some examples: \$300 loan, repaid in 2 monthly instalments, costs \$11.33. A \$500 3-payment loan costs \$15.77. perpaid in 4 monthly instalments, costs \$11.33. A \$500 3-payment loan costs \$15.77. a \$700 3-payment loan \$2.261, a \$1,000 4-payment loan \$2.261, a \$1,000 4-payment loan \$3.77.6. Compare these costs with others!

Payments shown in the table below include principal and charges. Our one rate of charge includes all conts. #### Tires and Cars

The year 1945 will be a testing time for the motorist. For another year he will carry on with the old tires and it is natural that quite a large number of cars will have to be laid up for the rest of the duration and until there is again freedom in the use of rubber and in the purchase of new

The desire of motorists, of course, is to keep their cars running until the time comes when they will be able to replace them and possibly to buy new cars. But the outlook for that is not very near. That will be after the war is over and the result the outlook for that is not very near. That will be after the war is over and the result is that it will be necessary for owners to care for the tires they possess and make them stretch out until a better day for

them stretch out "until a better day for tires comes around.

Owen Sound Sun Times contains some good suggestions which any motorist will be interested in because they can help to extend the life of the car as well as to tide owners over a period when the demands and needs of the war are paramount. Here are some of them:

Here's the situation: Makers of telephone equipment have been busy on orders of all kinds for the armed services. For them, the time to start reconverting still lies ahead. Even after war needs have been met, these manufac-turers must make a major change-over before they can re-sume normal production of sup-plies for civilian use . . . Which means that we must continue to defer many requests for telephone service, awaiting the day (we hope it may not be too long delayed!) it may not be too long delayed; when materials in adequate vol-ume and skilled manpower again become available. The applica-tions on our waiting list will be filled as promptly and fairly as possible, on a first-come-first-served basis.

### A BUSINESS SESSION

### The London Life Annual Report

Questions and Answers that reveal valuable information

### Is the Company playing an Important part in providing What are the resources of the Company?

It certainly is. The Billion Dollar mark in life Insurance in force was passed during the year. The total at the end of 1944 was one billion and thirtyfour million. This is about one-ninth of all the life nsurance in force in Canada.

How much insurance did Canadians buy from you Company last year?.

One hundred and sixteen million-more than two million dollars a week.

War claims were twice as large as a year ago but well wax claims were twice as large as a year ago but well within the amoint for which provision had been made. The Company has made preparation for unusual strain by building strong contingency reserves, as well as providing for claims which may have occurred but of which it has not received word.

### What are the Company's principal financial obligations?

Policy reserves are the chief item. They amount to over \$151,000,000 and represent 74% of the total assets. Other liabilities to policyholders and their families, such as money left on deposit with the Company and policy dividends, total almost Company and policy dividends, total almost \$27,000,000, which is a further 13.2%. Other items including staff pension fund, capital, provision for taxes and miscellaneous liabilities total \$10,700,000 or 5,2% of the assets.

The total assets are now \$204,282,000. Over ninety-two percent of this sum is required to cover the obligations just mentioned and the remaining 7.6% represents contingency and surplus funds held for added security to policyholders.

### How about dividend rates in 1945?

London Life policyholders will receive the same high rate of dividends during 1945, despite the lower interest earned on investments. A further decrease in the expense rate has helped to make this possible.

### How do you account for the progress of The London Life?

An essential factor has been its long established record for insurance at low cost to policyholders, while maintaining a strong financial position.

The public resilite the advantage they gain from the Company's financial stability, and they appreciate the high reputation the members of its sales organization have earned for themselves as counsellors. The London Life selects as representatives only shose who show a definite fitness for the life insur-ance business and then spares no efforts in training and equipping them to give sound advice.

It is the combination of these factors—low cost, public confidence and highly skilled sales service—which is the basis of the London Life's rapid and healthy growth.

A copy of the 1944 Angual Report will be mailed upon request.

### To Our Policyholders

Our ninety-eighth annual report contains evidence of another very satisfactory year of progress in 1944.

Great numbers have again been helped through distressing circumstances because of your co-operation with many thousands of others who constitute this company.

At the same time the security behind Canada Life contracts has been still further strengthened as a result of favorable mortality experience, a stabilized interest rate and decreased operational costs.

A complete annual report is available at any of our offices.

### To Our Policyholders

Our ninety-eighth annual report contains evidence of another very satisfactory year of progress in 1944.

Great numbers have again been helped through distressing circumstances because of your co-operation with many thousands of others who constitute this company,

At the same time the security behind Canada Life contracts has been still further. strengthened as a result of favorable mortality experience, a stabilized interest rate and decreased operational costs.

# DISTRICT OF OTTAWA Is Declared AN EMERGENCY SHELTER AREA

As part of a plan to meet the state of congestion which exists in the district of Ottawa, Board order no. 474 requires that all persons who propose to rent or occupy family quarters in the area must first obtain a permit from the Administrator of Emergency Shelter in Ottawa.

The purpose of the order is to help those who must be in Ottawa to obtain necessary accommodation.

WARNING

All persons who are making plans to move to Ottawa should write to the Administrator asking for full particulars of the Emergency Shelter Regulations.

Every person who, after January 17, 1945, occupies any family quarters in the district contrary to the order, commits an offence and, in addition to other penalties, will be required by the Administrator to vacate the shelter and the district at his own expense.

The Emergency Shelter Regulations provide serious penalties for hindering noting these efforts and for any contravention of the regulations or of an order of the Board or of the Administrator.

## They Wouldn't Have Believed It!

 If anyone had told the office managers of the early nineties that in a few years, as time goes, electrically powered machines would do, in seconds, the work that took hours of toil, they wouldn't have believed it.

Yes, electricity has certainly lightened the way in this streamlined age. In the city or on the farm we rely on it for light, for heat, for power, for comfort. It lightens our burdens, dispels darkness and increases our pleasures. The men who supply Hydro to our homes—have made it so dependable, so economical that it is an accepted part of our

Yet, so great and varied are the possible services of electricity that the benefits we have so far accepted represent little more than the most obvious uses. It would be rash indeed to attempt to foretell or limit the future applications of electric power. In planning for tomorrow, take full advantage of the benefits that electricity and electrical equipment can bring to everyone.
